HSC - 86%

Skills

Languages: HTML, CSS, Javascript, React, Mongodb, Nodejs, Expressjs, TailwindCss, Java, Git, Nextjs

Professional Experience

Senthuron Tech

Jun 2024 – Dec 2024

Web Developer

Client: GM Building Chemicals

- Developed a responsive website for GMBC, a chemical-based company
- Designed and implemented key pages including the homepage, service page, and projects page to showcase the company's offerings.
- Integrated seamless navigation and optimized the user experience with a clean, professional layout.

Client: Vdhya

- Developed a user-friendly educational content website for VDHYA
- Designed interactive pages for course listings, tutorials, and resources to enhance the learning experience.
- Implemented responsive design and seamless navigation to ensure accessibility across devices.

Client: AgriInverse

- Developed a responsive agriculture-based website for Agri Inverse
- Implemented key pages such as the homepage and service page, providing relevant agricultural insights and services.
- Optimized website performance for faster loading times and improved user experience across different devices.

Projects

Expense Management System

May 2024

- Developed a full-stack Expense Management System using the MERN stack for efficient tracking and reporting of personal expenses.
- Integrated real-time data management and user authentication to securely manage financial transactions.
- Created a responsive user interface using React.js, ensuring seamless access across various devices.

Parkinson's Disease Detection

May 2023

- Developed a machine learning model using Python and scikit-learn to detect Parkinson's disease from voice data and symptoms.
- Preprocessed and analyzed clinical data to extract meaningful features for accurate disease prediction.
- Implemented a user-friendly interface to visualize detection results and assist healthcare professionals in early diagnosis.
